## Thank You to Our 2018 Peer Reviewers

John Geissman<sup>1</sup> , Laurent Jolivet<sup>2</sup> , Margi Rusmore<sup>3</sup>, Nathan Niemi<sup>4</sup> , and Taylor Schildgen<sup>5</sup> 

<sup>1</sup>Department of Geosciences, University of Texas at Dallas, Richardson, TX, USA, <sup>2</sup>Institut des Sciences de la Terre de Paris (ISTeP), Sorbonne Université, Paris, France, <sup>3</sup>Department of Geology, Occidental College, Los Angeles, CA, USA, <sup>4</sup>Department of Earth and Environmental Sciences, University of Michigan, Ann Arbor, MI, USA, <sup>5</sup>Institute of Earth and Environmental Science, University of Potsdam, Potsdam, Germany

**Abstract** An essential, respected, and critical aspect of the modern practice of science and scientific publishing is peer review. The process of peer review facilitates best practices in scientific conduct and communication, ensuring that manuscripts published are as accurate, valuable, and clearly communicated. The over 216 papers published in *Tectonics* in 2018 benefit from the time, effort, and expertise of our reviewers who have provided thoughtfully considered advice on each manuscript. This role is critical to advancing our understanding of the evolution of the continents and their margins, as these reviews lead to even clearer and higher-quality papers. In 2018, the over 443 papers submitted to *Tectonics* were the beneficiaries of more than 1,010 reviews provided by 668 members of the tectonics community and related disciplines. To everyone who has volunteered their time and intellect to peer reviewing, thank you for helping *Tectonics* and all other AGU Publications provide the best science possible.

## Referees for 2018

Individuals in italics provided three or more reviews for *Tectonics* during the year.
